

# Desktop mapping

New from Ordnance Survey Options™, Desktop mapping, an Internet business mapping service brought to your desk. You get the very latest information from the Superplan®, Siteplan® and Landplan® datasets, allowing you the flexibility to create digital and graphic mapping. Now online, giving you easy access without leaving the office. Easy to use:

- 1 Simply log in.
- 2 Select your area of interest (site-centred by postcode, place name or grid reference).
- 3 Download your map for printing on your office printer or plotter, or choose data for import into a range of graphics packages (Superplan Data® is compatible with most popular CAD systems and comes in DXF™ and Siteplan Data™ is a TIFF image for use in most desktop graphic packages).
- 4 Your account is charged accordingly and you only pay for what you use.

Whatever you are – an architect, engineer, surveyor or estate manager – Desktop mapping has a variety of uses:

- Project planning and design
- Site maps
- Feasibility studies
- Planning applications
- Materials estimation
- Location mapping
- Illustrating presentations and reports
