

Superplan Data®

Superplan Data is digital mapping data you control. Using computer-aided design (CAD) systems, you have the power to customise the most detailed large-scale data of Great Britain in site-centred form. So if you are an architect, engineer, constructor or surveyor, Superplan Data has a great variety of uses:

- Project planning and design
- Site maps
- Feasibility studies
- Planning applications
- Location mapping
- Illustrating presentations and reports
